

Vijay Songire

(Assistant Professor, St. John College of Humanities and Sciences, Palghar.)

Plastic, plastic!!

Plastic use has spread through everyday life,
In cities, it's foolishly found everywhere,
Malls, small shops, and hawkers add to the strife,
A growing problem no one seems to care.
The government ignores this critical fight,
Political parties remain silent still,
The issue stays untouched, no end in sight,
And productions seem to lack the will.
Plastic harms the earth, wildlife in despair,
Animals ingest it, causing death and pain,
We must reduce, take action, and be fair,
Or else, our planet will continue to wane.
Opt for paper, biodegradable and kind,

Awareness and action are the urgent plea,
Together we must work, and change our mind,
To make the earth plastic-free, wild, and free.
